

## Take the headache out of blastroom full floor abrasive recovery

**A blastroom floor is a tough environment. That is why we keep the TruGlide Recovery Floor simple:**

**Simple price** - the floor does not require a lot of materials to make. We can keep material costs down and sell to you cheaper.

**Simple installation** - modular design drops into a shallow concrete foundation and bolts together. Get up and running faster.

**Simple operation** - minimal moving parts guarantees you more reliability.

**Simple maintenance** - no moving parts inside the blastroom ensures you spend less on maintenance.

The TruGlide Recovery Floor is a bolt together modular design to ship anywhere.

Suitable for new blastrooms, upgrades and blastroom equipment manufacturers.

**Save your valuable factory space and reduce noise.**

**Don't waste valuable factory floor space with bulky swing doors.**

Blastechnik Dura-Door will eliminate a lot of wasted space, as well as reduce and dampen the blasting noise coming from the blast room.

The Dura-Door rubber roll up door is produced from a tough, wear resistant SBR material, manufactured specifically for the application to provide years of trouble free service.

The Dura-Door rubber roll up door is available with all new Blastechnik blast rooms and as a modernization upgrade to existing blast rooms.
