

## E-FEED SERIES

### ➡ E-FEED PM120

PM120 Series equipment is suitable for semi-automatic applications. Fast cleaning. The lean design lets you utilise the production floor space. Smooth and effective powder distribution. Brilliant Coating Performance. Available for 20 powder coating guns.

### ➡ E-FEED PM220

PM220 Series equipment is suitable for automatic applications. Faster and thorough cleaning. The lean design lets you utilise the production floor space. The guided interface makes it easier to use the system. Smooth and effective powder distribution. Best solution for continuous production. Available for up to 20 powder coating guns.

### ➡ E-FEED PM320E

PM320E Series equipment is Electron's most advanced powder management center. Fastest and thorough cleaning. The lean design lets you utilise the production floor space. The guided interface makes it easier to use the system. Smooth and effective powder distribution. The system is fully encapsulated against any powder leakage. Used with an Exhaust System such as Electron Filter Groups. Best solution for continuous production. Available for 24 powder coating guns.

# POWDER COATING EQUIPMENTS

## E-ROBOT SERIES

### Reciprocators & PLC Systems

#### Automatic Series

- Get a perfect finish with consistent uniform film thickness
- Centralized powder feed hopper with powder pumps
- Perfectly synchronized with reciprocators
- Speed-up production

#### Reciprocators

- Smooth, swift and precise movement for speedy and uniform coating
- Reduced powder consumption
- Quick operation change with pre-programmable option settings for automatic selections of stroke and speed
- User friendly touch screen panel to control speed and stroke length
- Wide memory with 99 receipts. Last working time and total working time can be saved
- PLC controlled axis and automations
